SRM Institute of Science and Technology

Faculty of Engineering and Technology Ramapuram Campus

Department of Computer Science & Engineering

Academic Year: 2022-23 (ODD) Continuous Learning Assessment -2

Course Code & Title: 18CSC301T &	& Formal	Languages a	nd Automata	Theor
Willes I lille To Time: To and				

Date: 19.10.2022

Duration: 90 Mins
Year & Sem: III Year /V Sem (CSE, CSE with all specialization & IT) Max. Marks: 50

Set -A

Course articulation matrix:

						_				PO	ro	PO	PSU	1.20	130
	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO7	ros	PO9	10 10	ii	12	1	2	3

Part - A

Consider the following grammar S → NP VP S → Aux NP VP	rks 25	3	2, 3	4	4.2.1
$S \rightarrow NP VP$			0.000		100000
$S \rightarrow NP VP$		1			
S - Aux NP VP				1	
I S THE CALLS LAW TA		17	1		
S - VP	- 1	V	1		
NP → Det NOM			1		
NP - Del Nom		,	1		
NOM → Noun			1		1
NOM → Noun NOM				1	
VP → Verb	- 1				
VP → Verb NP		1	1		1
Det that this a the				1	1
Name - book flight mear mar-	1				
True hook include I tou					1
Aux - does i. How many productions in the given CFG are already in CNF? (1 Mark)					1
i. How many productions in the given					
a. 16	N. L.				
b. 12					
c, 4		1	1		
d. 13 grammar. (1 Mark)				1.,	
ii. The given production are Type grammar. (1 Mark)					
a. 0'					
b. 1					No.
c. 2	1				
d. 3					

Register number	
-----------------	--

	 iv. Give the equivalent PDA rules for the grammar given in question (5 marks) v. Check if the above grammar could generate the string "does this flight include a meal" (4 marks) vi. Simplify the grammar (7 Marks) vii. Convert the above CFG to Chomsky Normal Form (CNF) (4 Marks) 		4		 A	4,2,1
	Read the following scenario and answer the following questions. Consider there are two color cubes (Red and Yellow) they are equal in number. The logic is Red cube to be taken and stack all the Red cubes first. Later once no more Red cubes are available, for each Yellow cube remove one Red cube from the stack. Make sure stack should be cleared.	25	1	2,		4.2.1
- 1	i. What is the maximum stack size for a PDA? (1 Mark)		1		1	
	a. n					
	b. 2 ^ n c. infinite				10	
- 1	d. n * n		1		1	
-	ii. Is the language generated for the given scenario is regular? (1 Mark)		1			
	a. Yes				П	
- 1	b. No		П		П	
- 1	iii. Generate the accepting language for above Scenario. (3 Marks)		П		!	
	iv. Construct CFG for the above Scenario. (4 Marks)				11	
	v. Design PDA transitions for the given scenario. (5 marks) vi. List the PDA and CFG Tuple representations for above scenario. (4		Ш		П	
2	Marks)		Ш			
-1-	vii. Illustrate a PDA Diagram for the above scenario. (4 Marks)		П	4		
	viii. Check whether 3 consecutive yellow followed by three consecutive					
	red balls can be taken? (3 Marks)			-		-
3	Consider the following CFG for any programming construct	25	3	2	4	4.2.1
	BLOCK → STMT { STMTS } STMTS → a STMT STMTS					
	STMT - EXPR if (EXPR) BLOCK while (EXPR) BLOCK do BLOCK while		11			4
	(EXPR) BLOCK		Ш		1	
	EXPR - a constant EXPR + EXPR EXPR - EXPR EXPR * EXPR				11	
	EXPR/EXPR				11	
	i. What can be told about the given grammar? (1 Mark)				11	
	 a. It is ambiguous for the string a+a*a b. It is unambiguous for the string a+a*a 		1		П	
	c. It cannot derive the string a+a*a					
- 1	d. It can derive the string a+*a-					
	ii. Which of the following is not true about ambiguous grammar? (1		1			
	Mark)	1	1	1	11	
	 a. It has two leftmost derivations. b. It has two rightmost derivations. 	1	1	1	11	
	o. It is sufficient to derive one left		1	1		\
	o. It is sufficient to derive one leftmost and one rightmost derivation to prove its ambiguity.		1	1	1	1
	d. It has two parse trees.				1	1
	iii. Remove the null production (3 Marks)	1	١			1
	iv. Remove the unit production (4 Marks)	1	1			1
	v. Remove the useless symbols (4 Marks)					1
	vi. Convert it into GNF (12 Marks)	1	- 1	- 1	- 1
